UNIVERSAL WATER PUMPS FOR GM LT1 ENGINE

NEW for 2011!

**In Stock
&
Ready to Ship!**

Friday, February 25th, 2011

Cleveland, Ohio

Tuff Stuff Performance Accessories is pleased to announce the availability of new aluminum water pumps for the GM 5.7L LT1 engine.

These pumps are unique in that one part number covers all of the popular LT1 applications including the 1992-96 Corvette, 1993-96 Camaro & Firebird and the 1994-96 Caprice & Impala. These Tuff Stuff pumps eliminate the need to stock 4 separate water pumps.

Available in chrome plated, polished aluminum or as cast finishes, these pumps incorporate a heavy duty center shaft, heavy duty bearings and premium quality seals. Gaskets and chrome plated fittings are included with each pump.

Chrome plated #1362A
Polished aluminum #1362B
As cast #1362C

Tuff Stuff Performance Accessories is a family-owned and operated company that produces premium quality, made in USA, chrome plated, polished aluminum and powder coated alternators, starters, water pumps, power steering pumps, master cylinders, power brake boosters and related accessories.
